

HUWAIS AL QURNI A

DATA ANALYST/DATA ENGINEER

+91 9597989272 huwaisalqurini@gmail.com linkedin.com/in/huwaisalqurni Kalpakkam, India

SUMMARY

Computer Science graduate with specialization in Artificial Intelligence and Data Science, currently working as an intern in a data-focused backend role. Experience in Python programming, SQL, data processing, and database operations. Hands-on exposure to structured data handling and system workflow implementation in healthcare-related environments. Familiar with machine learning fundamentals and building data-driven software solutions. Able to contribute to backend systems, data logic, and application development in technical team environments.

EXPERIENCE

DATA ENGINEER - INTERN

ADA Global (Digital Analytics)

12/2025 Kalpakkam, India

A company focusing on digital analytics solutions

- Implemented backend data logic to support Emergency Department workflows, including structured handling of patient and visit-related system data.
- Developed Python scripts to process structured healthcare messages and operational data
- Extracted and organized patient details, visit information, and clinical measurements
- Assisted in aligning system data structures with real-world hospital processes
- Performed SQL queries and handled PostgreSQL database operations
- Supported data validation and field mapping for system testing environments

DATA SCIENCE INTERN

Pantech Solutions

05/2023 - 06/2023 India

A company specializing in technology solutions

- Performed data analysis using Python, Pandas, and NumPy
- Implemented Python-based data visualization workflows using Matplotlib for exploratory data analysis.
- Explored basic machine learning models and data preprocessing techniques

CYBERSECURITY VIRTUAL INTERN

Tata Forage

07/2024 - 07/2024 India

Virtual internship experience in cybersecurity

- Gained foundational knowledge of Identity and Access Management (IAM) principles, including user roles, access controls, and authentication concepts.
- Learned access control, role management, and basic security workflows
- Simulated risk assessment and incident response tasks

KEY ACHIEVEMENTS

3D Avatar Virtual Chatbot

Built a 3D AI-powered chatbot presented at ICCET25

LANGUAGES

English

Proficient

SKILLS

Python Scripting

SQL

Gmail

Python

JavaScript

Data Structures

PostgreSQL

Git

Visual Studio Code

PyCharm

Pandas

Numpy

Matplotlib

Cybersecurity

IAM

React

Three.js

WordPress

PROJECTS

3D Avatar Virtual Chatbot

01/2023 - 03/2023 Virtual

A project that involves developing an AI chatbot

- Built a 3D AI-powered chatbot using React Three Fiber and Three.js
- Integrated voice interaction and backend API
- Presented as a conference paper at ICCET25

FitNet – Fitness Website

02/2024 - 04/2024 Virtual

A fitness guidance website project

- Developed a responsive WordPress website
- Provided personalized fitness and diet guidance
- Utilized structured content management

EDUCATION

B.Tech – Computer Science Engineering (AI & DS)

Hindustan Institute of Technology and Science

📅 08/2021 - 05/2025 📍 Padur, Tamil Nadu
